"In the presence of trouble, some buy crutches, others grow wings." -Harold W. Ruoff

Education has always been the cornerstone of a society, the pillar on which the embankment of human existence rests or the perennial beacon as mankind made its way in quest of the unknown. True education strives to instill in every pupil a sense of virtue, wisdom, sensitivity towards the need of others, life skills, and right attitude, which in turn helps them to explore, act and excel.

The mission ICFAI University, Dehradun centers on 3 ideals: education, enlightenment and emancipation. It is incongruous, distinctive and sought after as the University walk that extra bit with the students ensuring the actualization of the three "E's".

To take a leap in the same direction it gives me immense pleasure to invite you to go through the magazine of ICFAI University Dehradun -"IUD Chronicle".

The editorial team has worked hard to put together this magazine. My congratulations to the entire team of IUD Chronicle and wish them all the best.

"Imagination Is the beginning of creation. You imagine what you desire, you will what you imagine, and you create what you will".

Dr. Pawan K. Aggarwal
Vice Chancellor
ICFAI University
Dehradun.

From Faculty Coordinator

It feels great and highly honoured to extend my greetings to all the readers of this magazine as the editor of IUD Chronicle from the department of legal studies. A thought that has been enduring in mind when it becomes real ; is truly an interesting and exciting experience This Magazine is one such cherished work that had its roots in the persuasion. It imbibes the snapshot of the various activities and advancements for all associated with the THE ICFAI UNIVERSITY DEHRADUN. Proper communication plays a vital role in institution's development. This piece of work will serve to reinforce and allow increased awareness, improved interaction and integration among all of us. It also helps in building up teamwork which is very much needed today in the world of competition. It provides a platform for exposing the merits and academic achievements of the faculty and students. This enhances the documentation culture of the institute. This would definitely create an impact in the minds of reader, by way of providing larger visibility and dimension to the campus. I hope that this culture of releasing the college Magazine would continue forever. This Magazine is a medium, and will bridge the gap between achievements and publicity.

It is expected that wide support for this mission will be provided through the reader's valuable suggestions and comments. This is only a small step towards a long journey. To achieve progress and to meet objectives we have to cross numerous milestones. This maiden issue of IUD Chronicles, should inspire all of us for a new beginning enlighten with hope, confidence and faith in each other in the road ahead.....

Happy Reading !!!

Gaurav Mittal (FOL)

Demonetisation of Rs 500 and Rs 1,000, enacted by the Government of India, is a great step to control the black money . But it is difficult to invent a machine that could detect the destructive black mind of dishonest human being and convert it to a useful creative mind. Swami Vivekananda had once said in America, "In your country, clothes make a gentleman, in my country character does."

In today's context this statement of Swamiji holds good with a question mark. The word character' is now being replaced by cleverly and cruelty by some people. Swamiji told, "All knowledge that the world has ever received comes from the mind; the infinite library of the universe is in our own mind". He also said, "It is our mental attitude which makes the world what it is for us. Our thought makes things beautiful or ugly. The whole world is in our own minds. Learn to see things in the proper light".,The pure mind should not be polluted with attitude. The simplest solution is to change the attitude from negative to positive.

Dr. T.K. Mandal(ITS)

Flowing ink

On 9th November Wednesday afternoon, my phone bell rings, person on the other side, in Deep dusky voice said, "Sir, if you have surplus currency notes of Rs500 and Rs1000, I have a plan for you." That kept me gasping, is scrapping of these currencies an opportunity or a threat?

8th November, 8 p.m. when Narendra Modi, our honorable Prime Minister, drop two atomic bombs on its citizens, It took the whole country by surprise and shock. The social and the digital media got hyper active. "News channels had prepared for Clinton & Trump, Modi came out of syllabus." But was this decision, sudden I think no, it was written on the walls. It started with bank account for all, then linking bank account with Aadhar card, third step was disclosure of bank accounts and Aadhar number in income tax return, followed by income disclosure scheme and now scrapping legal tender denominations of Rs 500 and Rs 1000. It seems as all of it was planned. But that may be just the tip of the iceberg, consolidation of land holdings and comprehensive policy on gold is next.

The year 2017 is an important milestone for India and would mark our transition from a cash economy to a less cash and a digital economy. But the buzzwords like "less cash", "cashless" and "digital" do not really convey the range and diversity of the transition. It is actually a transition to a new social and cultural pattern. Migrating from a cash economy to a digital economy requires a big cultural and social shift, and a recast of the whole mindset. Making gadgets available to the society will not help unless we bring about a social and cultural transformation. There are also marked class issues which are built into India's cashless transition. India is a country that has one foot in the future and the other in the Stone Age — almost literally. India had the most vibrant and innovative high-tech ecosystems in the world; but alongside, there exists a planet of hundreds of millions of people living in villages who are happy with a technology that's hardly more sophisticated than a bullock cart and a plow. Only 17 per cent of the India's population currently has access to a Smartphone. Thus, moving to a digital and cashless way of life involves a shift in cultural pattern, and such patterns are often hard to break. But once they are broken and new ways emerge, new patterns become solidified as societies update the way they function. As the country debates over this, for optimistic people it is an opportunity, for pessimistic it is a threat and for the realistic people like me I have to approach my children and borrow money from them, as perhaps their piggy boxes are full of legal tender.

Dr.Amit Joshi
IBS, Dehradun

From Editor's Desk

Dear Reader,

"A Small Step for a Man, A Giant Leap for Mankind", stated by Neil Armstrong, when he set first step on moon. The step of starting IUD-Chronicle could be a giant leap for our university. Taking the output in form of IUD-Chronicle was not an easy task, it took lot of sleepless nights, unimaginable risk, countless hours of planning and gallons intake of caffeine.

Welcome to the first edition of IUD-Chronicle. I would like to wish you a very happy New Year, we decided to launch the first issue with New Year. New Year is a time for beginnings, new life and change.

I would like to acknowledge my helping hands, i.e. Prankit Mishra and Utkarsh Kumar in designing of such a creative magazine.

Reading through this first issue of IUD-Chronicle, it is hard to avoid the conclusion that the concept of demonetization took the warmth of money and made winters chillier ever.

CLEAN CAMPUS DRIVE

It is the responsibility of each and every Indian citizen to make India, a "Swachh" country. The students of IBS, ICFAI University Dehradun undertook a cleanliness drive with a spate of activities on 4th November 2016 in accordance with the nation-wide Swachh Bharat Cleanliness Campaign launched by the Prime Minister on 2nd Oct., 2014.

A special cleanliness drive was carried out to reverberate the mission of the campaigning. The students took a pledge to clean their homes, public places & surroundings. Students were given handy tips to keep their surroundings and school clean. Along with staff, students were actively involved in the cleanliness drive. They enthusiastically took up brooms and garbage bags to clean up every nook and corner of the corridors, school grounds, parking lots and nearby areas. The whole drive was quite inspiring and motivating. The students realized that any work is best done when it is carried out by a person himself. It also made the students aware of the dignity of labour.

Awards Conferred On ICFAIans

It was a proud moment for the ICFAI University Dehradun, as it was conferred Green Campus Award by National Institute of Cleanliness Education and Research (NICER) at the World Cleanliness Convention 2016 held during December 12-13, 2016 at New Delhi.

Dr. Pawan K. Aggarwal, Vice Chancellor, ICFAI University – Dehradun received “Lifetime Achievement Award” for making outstanding contribution in the specialized areas related to education, training and development.

Maj. V.N.Saxena (Retd.), Faculty, ICFAI University Dehradun has been conferred "National Cleanliness and Hygiene Award" for his paper published last year titled 'A Unique Model Recommended to be implemented in Religious Shrines across India as a part of 'Swachh Bharat Abhiyan', at the World Cleanliness Convention 2016, held during 12-13 December 2016 at New Delhi

"IUD Utsav 2016"

The ICFAI University Dehradun organized its Cultural and Sports annual fest (IUD – Utsav 2016) during November 17-20, 2016. The students from all the disciplines of the ICFAI University, Dehradun participated in the cultural events like treasure hunt, master chef, fashion show, battle of bands, mehndi competition, rangoli competition, solo duet singing competitions, Photography competition, tattoo making competition, Solo and Group dance

competition, Story writing using photography competition and sports events like Kho-kho, badminton, basket-ball, table tennis, arm wrestling, kabaddi, chess and carom. More than 20 Universities, Institutes and Collages including DIT Unison University, IMS Unison University, JB Institute of Technology, Shivalik Collage of Engineering, Uttaranchal University and Doon Business School participated in the Fest.

A Student Alumni Meet was also organized by the ICFAI University Dehradun at this occasion where the newly admitted students interacted with the passed out students of the University during the Fest.

Shri Sharad Krishna, Director HR (Retd.), Uttarakhand Power Corporation Limited (UPCL), was the Chief Guest for the opening ceremony and Hon'ble Justice K.D Shahi (Retd) was the Chief Guest at the occasion of the closing and prize distribution ceremony.

National Model United Nations (MUN)

by THE ICFAI University Dehradun

ICFAI University Dehradun organized National Model United Nations(MUN) on 27- 28 August, 2016, with a view to demonstrate how international relations are developed and strengthened through discussions on a range of pressing global issues.

Model United Nations is an extra-curricular activity where students represent themselves as delegates of United Nations. As evident from the name itself, they represent various countries and simulate U.N. The sole aim of IUD-MUN was to create awareness about the world affairs and refurbish diplomatic skills of the students.

The MUN combined four units: GA-DISEC (The Disarmament and Security Committee), UNDP (United Nations Development Programme), UNHRC (United Nations Human Rights Council) and AIPPM (All India Political Parties Meet)

Each Unit was given an Agenda. On the first day the committee started with agenda of review of reservation where the parties raised the motion in which BJP leader UMA BHARTI raised a question that reservation should be given on the basis of economic proportion. Against the statement of UMA BHARTI, RJD Chief LALU PRASHAD alleged that BJP wanted to end the reservation.

ENGINEER'S DAY

Each year the aspiring engineers of The ICFAI Tech School (ITS), The ICFAI University celebrate their own day in a very great and enthusiastic manner comprising of series of events: Like computer coding, structural designing | web designing | computer gaming | paper presentation of technical topics | model expo of working and non- working technical and scientific models | group discussions and debates on latest technological trends across the globe ; and much more.

ITS believes that “Engineering is the art of directing men and controlling the forces and materials of nature for the benefits of human race.”

And all future engineers of ITS say -

“Hope we too will become skilled and successful engineers, and make some of our significant contributions in the development process. ”

10TH NOV 2016 DEMONETIZATION OF Rs.500 & Rs. 1000 CURRENCY NOTES- A WATERSHED MOMENT IN FIGHT AGAINST BLACK MONEY

Abstract :-

In the present era, issue of BLACK MONEY has come at forefront of the society with active participation of our youth and parliament. The main aim of this seminar is to know the present status of black money of INDIA, the steps taken by Govt. Of India to curb black money i.e. demonetization of Rs500 & Rs1000 notes and its impact on Public and future challenges. This seminar represents how the Govt. Of INDIA has taken an initiative to curb black money from Indian Economy by demonetization of Rs500 & Rs1000 currency notes on 08-11-2016.

Panel Discussion

On this session all the panelists gave their views with the help of various statistics & real life examples. They tried to present the current situation of the economy due to cash crisis after demonetization of Rs500 & Rs1000. They also mentioned the situation of black money holder and discussed kinds of corruption related to black money. The introduction of a new series of notes in high denominations of Rs 2,000 makes it possible to carry a larger value of money with fewer notes. The Rs 2,000 currency note will make it possible for huge amounts to change hands in illegal dealings without imposing any logistical challenges.

Panelists Present:-

Akansha, Ayush Garg, Anjaney Upadhyay , Parul Chauhan, Manish Masanta, Raj Kanya Ray, Tanmay Gupta and Mahasweta Naik

"GLOBAL MANAGEMENT EXPEDITION TO EUROPE"

COUNTRIES VISITED : Belgium, France & Netherlands

CITIES VISITED : Amsterdam, Brusseles, Rotterdam & Paris

DURATION : October, 21-29 2016

STUDENTS : MBA-1st year & 2nd year

FACULTY COORDINATOR : Dr Amit Joshi

On 21ST OCTOBER 2016, our MBA students, set for a study tour to Europe. At 6:00pm, they gathered at Mumbai International Airport, and at 9:30pm, the journey commenced on Saudia Airline. On 22nd October, 2016 they reached Paris at 6 pm, flight was delayed due to intense fog, and started their journey to Brussels and reached the hotel at 9pm.

Next morning they boarded the coach at 8 am, started city tour covering Orientation of Amsterdam, Rijksmuseum and Canal Cruise that took an hour. In this tour they explored Amsterdam's plenty of interesting facts. Everything in Amsterdam seemed magical when viewed from a boat and was the best way of sightseeing. later they visited Dam Square at 8 pm which was fascinating and happening place. Next morning students were ready at 5 am as they had to visit the Aalsmeer flower auction in North Holland near Amsterdam, the busiest floral market in the world. Daily, around 20 million flowers and decorative plants are traded here with well over 12 billion flowers traded annually in the six Flora Holland auctions in The Netherlands. This enormous central auction building in Aalsmeer has the largest footprint ($518,000 \text{ m}^2$) in the world while its floor space of $990,000 \text{ m}^2$ makes it the fourth largest building in the world. Inside, the building is a hive of activity. Endless numbers of small trains full of carts loaded with containers of flowers and plants are moved by electric-powered trucks or automated rails. Right after flower auction they visited to busiest port of Rotterdam and Logistics Company.

(Contd...)

The port of Rotterdam's annual throughput amounts to about 465 million tonnes. This makes the port of Rotterdam the largest port in Europe. The port area includes 12,500 ha (land and water, of which approx 6,000 ha are business sites). The total length of the port area is more than 40 km. Approximately 30,000 sea going vessels and 110,000 inland vessels visit the port of Rotterdam every year. Next day they visited Brussels parliament, The Brussels Parliament role mainly consists in controlling the government of the Brussels -Capital Region, approving the budget and creating and passing legislation in regional matters known as ordinances, which are legally binding. One of its first tasks after the Parliament is renewed is appointing five ministers and three regional secretaries of state, who together form the Region. There the students had an interactive session with the public relations officer.

Straight from there, the students headed to Paris and directly went to see one of the eight wonders of the world the Eiffel Tower. Every evening, the Eiffel Tower is adorned with its golden covering and sparkles for 5 minutes every hour. Next day they visited Lafayette mall, Louvre museum- 537 paintings,(including the painting of Mona Lisa), and cathedral church which has beautiful architecture. The last day was free day for the students and they were allowed to visit the local market to do shopping and purchase souvenirs. The trip was very educative, enriching and fun filled. In addition to the industries they visited, they learnt some new facts about rich culture of the foreign countries and tried to discover why they are so developed, the traffic sense, respect for others, the architect, belief to excel were some of the take back for the students.

Port Institute of Rotterdam

Lauure Museum, Paris

Moot Court Competitions

Faculty Incharges -

Saurabh Siddhartha

Ms. Navtika Singh

ICFAI Law School, ICFAI University Dehradun, has constituted a Moot Court Committee which works for creating a culture of mooting in law students and organises Intra and National Moot Courts at the University. One Moot court competition was held in the month of September with a vision to prepare Students of the Law department for the National moot court competitions. A total of 11 teams participated with full enthusiasm, with an aim to gain experience and knowledge. The competition was judged by Mr. Alok Kumar (Faculty, ICFAI University). The winning team was from 3rd year BBA-LL.B (Hons.) Aishwarya Sharma, Ankit Kumar and Smriti Katiyar. The Runner up for the Competition was a team from 1st year law (Pallavi Singh, Anchit Jain and Aditya Srivastava), The Best speaker was Ms Smriti Katiyar from BBA.LLB (Hons) 3rd year, 2nd Best Speaker was Mr Rudresh Srivastava, The Best researcher was Ankit Kumar from 3rd year BBA.LLB(Hons) and the 2nd Best Researcher was Anchit Jain of 1st year BBA.LLB(Hons).

Students of ICFAI Law School have been leaving their footprints in various National Moot Court competitions and have won UPES' 1st Dr. Paras Diwan Memorial Energy Law Moot Court and have been runner up IUJ 1st national Moot Court Competition where our Student Ms Himani Agarwal was entitled as the Best Speaker.

Legal Aid Camp

A LEGAL AID CAMP was organized by ICFAI Law School(ILS), The ICFAI University, Dehradun under the aegis of DLSA (District Legal Services Authority), Dehradun, on 20th October 2016, at village Haripura , Selaqui , Dehradun. The activity commenced with the welcome address by Dr. Pawan K. Aggarwal, Vice chancellor, The ICFAI University, Dehradun . The dignitaries at the Legal Aid Camp included Mr. Kuldeep Sharma, the Secretary DLSA, and President, Secretary and Joint Secretary of Bar Council of Dehradun . The Camp was organized by the legal Aid Faculty In-charge Mr. Sunil Kumar under the guidance of Smt.Monica Khorala The students also participated in giving legal advice to the needy persons and in creating awareness amongst the villagers about their legal rights through Dance, Dramas, Nukkad Nataks , Speeches , Posters and pamphlets . The students also advocated about the need of Swacch Bharat.

The Secretary, DLSA, Dehradun, Mr Kuldeep Sharma gave legal advice on various legal disputes. Nearly thirty five applications regarding various legal disputes have been forwarded to DLSA, Dehradun. The advocates present at the camp advised various needy persons on their concerned disputes . Numerous legal problems of local residents were attended by members of Faculty of ILS & requisite suggestions were made for resolving and redressing the legal disputes.

VISIT TO GOVERNMENT PRIMARY SCHOOL

As a social activity, the students of ICFAI Business School (IBS) visited a Govt.Primary School at Bahadurpur, Dehradun to teach the children about the Importance of education, personal hygiene and cleanliness.

"A Liberal education is at the heart of a civil society, and at the heart of a liberal education is the act of teaching."

-A. Bartlett Giamatti

Students of IBS Understanding the problem at school

Students of IBS & Govt. Primary School

Yoga and Meditation are now a part of ICFAI Education School's Curriculum

Faculty of ICFAI Education School (IEDs) at ICFAI University, Dehradun introduced the knowledge of yoga and meditation as an integral part of its course curriculum as it is believed to be an essential tool to develop a student's personality who will be future teacher. An interaction of students was also arranged with Mr. Deepak Purohit, GM, Pyramid Home Divine, followed by a visit to Pyramid Home Divine which is a centre for rejuvenation & transformation and a holistic health resort. Students also visited the Panch Tatva Pyramid having a water pool at the centre which was surrounding by VIBGYOR coloured antennas for charging the water with cosmic energy. Such an exposure helps students understand different ways of improving overall wellbeing.

This initiative was taken by Prof. Sarita Negi, Principal, IEDs. She believes that Meditation teaches us to attend to what is taking place within without reacting and this makes all the difference. It brings you freedom from the mind in this freedom we begin to experience who we are, distinct from our mental turmoil. We experience inner joy and contentment, we experience relief and inner relaxation, and we find a respite from the tumult of your life we have given ourself an inner vacation. This inner vacation is not a retreat from the world but the foundation for finding inner peace. One must also learn to apply the principle of attending in our worldly activities, so that one can apply oneself in the world more effectively. Through practicing meditation we can learn to be open to what comes before you in your daily life and give it your full attention.

- The path of work involves doing action with an attitude of detachment to fruits of action. This brings steadiness of mind.
- The control of emotions is the key to the path of worship. It helps to control the emotional instabilities by properly amassing the energy involved in it.
- The path of Philosophy is for attaining the intellectual sharpness and happiness.
- The path of Psychic Control enables us to culture our minds for achieving success in almost all endeavours of our lives. It gives a practical and easy approach to reach higher states of consciousness.

VISIT TO CENTER FOR AROMATIC PLANTS (CAP), SELAQUI

On 28-01-2016, the students of B.Ed. visited CENTER FOR AROMATIC PLANTS in Selaqui. The objective of CAP was to promote conservation, cultivation, processing and quality assessment of aromatic plants. The students visited the demonstration beds and gained information about different aromatic plants like Grass Lemon, Peppermint, Jiohi, Palmrose, Citronella, Damaskrose etc. They also enquired about the temperature, altitude, use and areas in which the above aromatic plants are grown and market linkage.

They also visited the net house, poly house and the mist chambers used to protect the plants. Mr. Sagar of CAP described the entire process of distillation and the extraction of oil with the help of distillation unit. Students were taken to the Fragrance Gallery to feel the aroma of different oils like Timur, Surai, Lantana, Bhangira, Ganiya grass etc.

Mr. Nirpendra Chauhan
Scientist In charge
revealed the growth
trend of aromatic
sector in Uttarakhand
and how the income is
generated for farmers
through the
commercialization of
crops.

Visit to CAP has enhanced the students' knowledge regarding the benefits of aromatic plants for Perfumery, Aromatherapy and cultivation of waste land. The students were accompanied by Prof. Sarita Negi and Ms. Atulya Verma of B.ED department of The ICFAI University, Dehradun.

World Ozone Day observed

World Ozone Day was observed by ICFAI Education Department (IEDs), The ICFAI University Dehradun on 16th September 2016 where poster making, slogan writing and discussion were organized highlighting the importance of Ozone layer. The program focussed on creating the awareness regarding ozone depletion substances. On this occasion the pupil teachers prepared charts and wrote slogans like "Save ozone, save nature, save future", "Ozone today, Oxygen tomorrow".

World Students' Day

On 15th Oct. 2016, IEdS, The ICFAI University, Dehradun celebrated the birth Anniversary of Dr. A.P.J Abdul Kalam which is declared as World Students' day by United Nation in the year 2010 to honor the great scientist. On this occasion all the B.Ed students visited 'New Life Academy' Middle School in Selaqui, Dehradun.

Motivational videos on the struggling life of Dr. A.P.J Abdul Kalam were shown to the students of class Sixth to Eighth. The B.Ed students Shubham, Tenzing, Mainksha, Reena, Monika and Cecily were present on this occasion. It was organized by Prof. Sarita Negi and assisted by Ms. Atulya Verma. Head Mistress of the school Ms. Ruchika Washington and other teachers were present during the interaction.

The main aim of this interactive session was to motivate the students & to celebrate the life of great scientist, tutor, philosopher, visionary, dynamic personality & a great teacher Dr. A.P.J.Abdul Kalam .

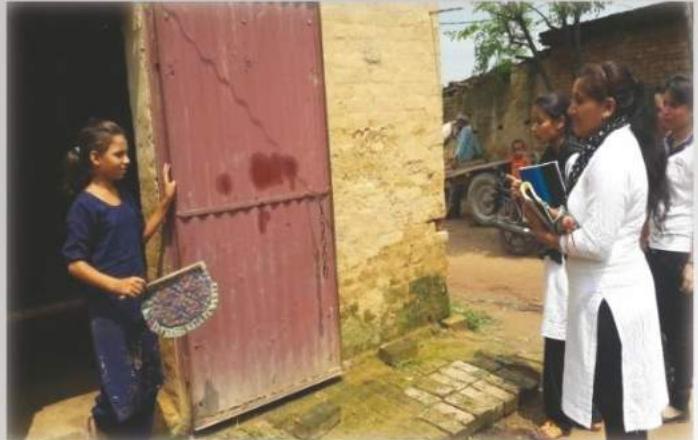

Dengue Awareness Drive

B.Ed students of The ICFAI University, Dehradun visited the brick kiln at Selaqui for Dengue Awareness drive to make the residents of Brick Kiln aware of cause, prevention and control of dengue. Residents of the brick yard were informed that the disease is deadly, as they had poor knowledge about dengue. They were directed to ensure that there are no mosquito breeding in their vicinity, to keep their nails clean and not to throw or spill water and keep the surrounding clean and dry. Students observed few cases of fever, cough and weakness among the children. They were informed about the reduction in the platelets count during dengue fever for which they were recommended to have the juice of Giloy once or twice a day.

They were told cost effective home remedies too to avoid mosquito bite, fever and throat ache. While interacting with those people, students came to know about their poor sanitation as they lack proper toilets, rooms etc. They were being made aware of their rights as a result of which they can have few amenities of healthy life. Students visited different houses in the vicinity. Most of the residents gave an accepting reply which reflected that they would surely work on our suggestions.

This awareness drive was organized by Prof. Sarita Negi, Principal, IEdS & Ms. Atulya Verma. Visiting students were Mainksha, Reena, Shubham, Tenzin, Deepika, Priyanka, Charu etc.

IBS - ECO : Let us find solutions....

The Indian economy has been growing at a fast pace, because of the economic liberalization introduced in the early 90s. The high growth of various sectors like financial services and IT brought about tremendous employment opportunities for the youth. At the same time there is a skill paradox where, on the one hand the corporate sector is desperately seeking out talented youth to fill the ever increasing positions; while on the other hand a large number of university graduates or degree holders cannot find a job. How can we reduce this mismatch between needs of the industry and skills acquired by our aspirants? Universities, colleges and various volunteering organizations should take action to correct the situation at the earliest. If this is not done, it would be a great injustice.

It was with this concern that invoked "IBS Economics Club". Initially the club's activities are targeted towards the activities in college campuses and involved in organizing various events just to create interest in the subject and show everyone that economics can be fun.

MARKETING MUSKET : Developing Skills in...

Objective

The club aims at providing the students a platform to experience marketing practically, to bridge the gap between concepts and its applications and to conduct competitions to motivate and prepare them for the job market.

Club Logo

The logo of this club is designed by Mr. Manish Alawe, student of MBA II semester, Batch of 2017.

Structure

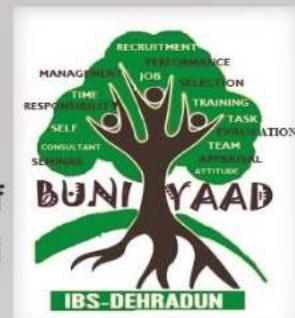

The club has two student coordinators who are responsible for coordinating the various activities in consultation with, Dr. Manish Kr. Srivastava, the Faculty advisor of the club.

The members of the club are divided into different teams and each team is designated with different names like "The Keller's", "The Kotler's", "The Armstrong's", "The Porter's", and "The Levitt's".

Enhancing Human Resource through...BUNIYAAD (Human Resource Club)

Objective of Buniyaad

The purpose of BUNIYAAD is to bring together students interested in the field of Human Resources Management, help them develop interpersonal skills needed in the corporate and encourage them to meet professionals who work in the field of Human Resources Management. This club is designed to help students learn more about Human Resource and what Human Resource Professionals do. The club promotes the active participation of the students. The HR students take the lead in arranging the events. This enables in developing the students to plan and arrange for the events successfully. The club activities are organized in a regular basis to promote the team spirit and implement the HR concept practically.

Hum Laye Hain Toofan Se Kashti Nikal Ke..

I looked through the pages of my life to cherish some of the alluring memories. I had dream of fascinating childhood like everyone has, but conditions at that time took away this birth right from me.

I too wanted to fall in love with something and make my dreams come true, but destiny took away this youth right from me.

**"Addressing those who belief their religion
is INDIANISM before any other ..ism"**

I wanted to relive the exquisite moments spent with my family for the last time, eat food cooked by mother, and cry on father's shoulder. But my fate took away this last wish from me. I was made of the soil of this country and returned when I left.

I am the son of every mother of this land because when I left there were tears in the eyes of every mother of this land.

I am the one who has lot to say, lot to do for this country but I don't have what you all have "EXISTENCE"

I am 109 years old, 24 years between you and 85 years in your thoughts.

I am the one who smiled a moment before my last breath..

I am the only one to accept the knots of death as wings of freedom with a heart full of satisfaction..

I am son of mother INDIA.

I AM BHAGAT SINGH.. (addressing you all before I became immortal)

JAI HIND JAI BHARAT

-Tanmay Gupta

Rags to Riches: The self-made journey so far

Everybody dreams of making it big in life. Everybody wants to be rich. If you were to guess whether the world's top 100 richest people got their money from someone else like their parents or uncle's or whether they made the money themselves, it would be wrong to guess that most of them are heirs.

Out of the world's hundred richest people today only 27 of them have inherited their wealth and the rest 73 are self-made billionaires. So, is it possible for most of us to go from zero to billionaire???

YES!!!

But you might think that even the self-made had advantages you might not have.

After all, Mark Zuckerberg's father is a dentist. May be it did not help him become a billionaire. After all a dentist couldn't be much help with software programming and hacking'. But you also might think that having a dentist father makes it easier to not worry about what you are going to eat tomorrow. There is no denying that Sergey Brin is a self-made man, but you might think that his father and grandfather, both were mathematicians , had something to do with him studying math in the first place. So if your father is a taxi driver or if your father is not alive, is it still possible to become a billionaire?

Apparently, it is. Researching the top 100 richest people in the world, all of whom are billionaires of course, it was found 8 were from absolutely humble backgrounds. On top of that, they never got a college degree:

- Larry Ellison, Oracle founder, an orphan
- Li Ka-Shing, Hong-Kong famous investor, an orphan
- Leonardo del Vecchio, Luxottica founder, an orphan
- Amancio Ortega, Zara founder, son of a rail-road worker
- John Fredriksen, oil magnate, son of a welder
- Sheldon Adelson, Las Vegas Sands founder, son of a cab driver
- Ingvar Kamprad, IKEA founder, son of a farmer
- Francois Pinault, French art collector, son of a lumber miller

SPECIAL MENTION

Roman Abramovich, Russian billionaire and owner of football club Chelsea would be number 9 on the list, but he got a correspondence degree in law later in life. So technically he does have a degree. But otherwise he was poor, an orphan and qualified.

Understanding Make In India: Progress at a Glance

Make in India has now become a calling card for investors to come and invest in the Indian growth story. To further the Indian manufacturing capabilities, the government is focusing on the development of sectors that are going to be the key focus in the coming years. By introduction of policy reforms along with a positive economic atmosphere, it has created a fertile ground for businesses to thrive in India. Make in India Initiative was launched globally in September, 2014 as a part of the Government of India's renewed focus on invigorating the country's manufacturing sector. The Make in India initiative has made a tremendous impact on the investment climate of the country as shown by significant growth of 46% in Foreign Direct Investment (FDI) and equity inflows with highest ever FDI inflows at US\$ 55.5 billion in 2015-16. After the launch of Make in India initiative, India has emerged as the fastest growing major economy with GDP growth rate above 7.6% in 2015-16 and projected to grow above 7% till 2020 as per International Monetary Fund (IMF).

World's largest internet based retailer Amazon opened a warehouse in Pune taking the total count to over 21 with a cumulative storage capacity of over 5 million cubic feet.

General Electric Transport and Alstom won contracts worth a combined US\$ 5.6 billion to supply India's railways with new locomotives.
Japanese PM Shinzo Abe's visit to India, Japan announced setting up a US\$ 12 billion fund for 'Make in India' related projects.

India achieved its highest ever FDI inflow in the financial year 2015-16 at US\$ 55.5 billion. Japanese technology giant Hitachi announced its plans to roll out ATMs in India - one of Asia's largest ATM markets - with the investment capital of US\$ 15 million.

India moved up 12 places and reached 130th position in "Ease of Doing Business 2016".

India moved up 1 position to become the world's seventh most valued 'nation brand', with an increase of 32% in its brand value to \$2.1 billion in 2015. It was the 8th most valued nation in the world in 2014.

Spice Group signed an MoU with the UP government to setup a mobile phone manufacturing unit in the state.

US chipmaker Qualcomm plans to establish an innovation lab in Bangalore to provide technical and engineering assistance to the selected companies.

India moved up to sixth position amongst the world's leading manufacturers. India has jumped by three positions from ninth position in the last report.

India attracted over US\$ 18 billion worth of investments since September 2014 from companies viewing the country as a potential electronics manufacturing powerhouse. International Tractors Ltd. (Sonalika) invested US\$ 75 million for setting up its new Hoshiarpur plant in Punjab.

The multi-sectoral Make in India Week (MIIW), a mega event held in Mumbai, was a platform to showcase nation's focus towards design, innovation and sustainability. MIIW was a resounding success which was attended by over 0.9 million visitors from 102 countries.

India's Gross Domestic Product (GDP) growth rate for quarter January-March stood at 7.9% as against 7.3% in October – December, thereby making it the fastest growing major economy in the world.

(Contd...)

In the last two years, the government has drastically improved the business climate of the country, pushing it towards the trajectory for high and sustainable growth. From a call-to-action to becoming a platform for national development, 'Make in India' has made its presence felt across the globe.

India jumped 13 positions and was placed second in retail potential in the 2016 Global Retail Development Index (GRDI). India was rated 15 in the 2015 Global Retail Development Index.

Actual work on the ground has started on 25% of investments commitments signed during the Make in India week.

India jumped 15 spots to reach 66th position in Global Innovation Index 2016. India was ranked 81 in 2015. India improved its performance on Logistics Performance Index by 19 positions when compared with its ranking in 2014. India's ranking has jumped from 54 in 2014 to 35 in 2016.

India jumped 16 places to the 39th rank in 2016 from last year's 55th position in the Global Competitiveness Index, highest jump of any country for this year. In 2014 India was in 71st position as per GCI 2014. India has thus jumped 32 positions in two years.

Schneider Electric is preparing to make India its export hub on the back of government's policies such as Make in India, Digital India and Smart City Mission. The World Bank's annual Doing Business 2017 report placed India in 130th position,

Vital Paper Products, major supply chain players in the paper products industry plans to set up a packaging product unit in the Special Economic Zone of Sri City, Andhra Pradesh, at an investment of Rs 60 crore (US\$ 8.89 million),

Havells India Limited, one of the top Indian consumer electrical equipment producer, plans to set up a new manufacturing unit near Bengaluru by making an investment of Rs 1,059 crore (US\$ 156.99 million), which would be its twelfth plant in India and its first outside north India.

THE FUTURE

By introduction of policy reforms along with a positive economic atmosphere, it has created a fertile ground for businesses to thrive in India.

□ Nidhi Singh Kushwaha

**At the stroke of the
midnight hour, when
the world sleeps,
India shall awake to
withdraw and
exchange the
invalidated money
the next morning!**

Demonatization

Moons back in 1947 on the 15th day of August Mr. Jawahar Lal Nehru uttered "At the stroke of midnight hour, when the world sleeps, India will awake to life and freedom," so was this day of 8th November' 2016 that Mr. Narendra Modi made an announcement that use of all Rs 500 and Rs1,000 currency notes would be invalid from midnight and that Rs 500 and Rs 2,000 currency notes would be issued in exchange for the old notes.

The endeavor so promulgated was said to be one aiming to eradicate the worm of black money, corruption and smuggling. Amidst all the support and the allegations made, the Indians ventured to adapt this sudden change and it seemed to have enlightened the banks and the ATM machines all of a sudden. This is the third time demonetization has taken place in India. The first demonetization took place in 1946 and Rs 1000 and Rs 10,000 notes were demonetized. Later in 1978, Rs. 1000, Rs. 5000 and Rs. 10,000 were demonetized. The decision had its aftermath in several ways and meanwhile the queue outside the banks and the ATM machines was still firm, the nation witnessed the entry of crisp purple-clad 2,000-rupee notes. The notes are being printed at Mysuru, Karnataka. While the social media gets flooded with selfies of people with that purple colored note, a woman delivers her baby standing in the queue waiting to withdraw the money, in Kanpur.

There are several questions that need to be answered, but this also requires efforts in equal measure from the end of every Indian so as to uproot this malice of black money.

Himani Agrawal (FOL)

How will we become wise now?

In the words of Benjamin Franklin “In wine there is wisdom, in beer there is Freedom, and in water there is bacteria.” As per the aforesaid quote wisest are those who cherish wine and dumbest those tend to instill their faith upon this colorless universal solvent. However, a sigh of relief for the so –called dumbstruck as the Uttarakhand High Court has directed the state government to impose “complete prohibition on the possession, distribution, collection, sale, purchase or consumption of alcohol/liquor including beer and intoxicants in Rudraprayag, Chamoli and Uttarkashi districts, from the next financial year i.e. 2017-2018, in order to raise the level of nutrition and the standard of living in the society.”

The bench observed that it is clearly stated in Article 47 of the Indian Constitution in the Directive Principles of State Policy that “the state shall endeavor to bring about prohibition of the consumption of intoxicating drinks and of drugs which are injurious to health.”

The 34 paged order was made by a division bench of Justice Rajiv Sharma and Justice Alok Singh, who after making several observations, under the PIL filed by one Udit Narayan Tiwari, banned the consumption of liquor. The bench also citing the example of the recent prohibition in the state of Bihar, the bench observed that - “The consumption of liquor is definitely injurious to health. It has destroyed many families.”

Also, the state government has been directed to ensure that “no liquor vend is open from the next financial year within a radius of one kilometre from all the educational institutions, hospitals and religious places in the State of Uttarakhand.” Although this is an antagonistic to Mr. Franklin’s idea yet it is a very much required one for a developed nation.

TRUTH IS STRANGER THAN FICTION

Indian-origin Faiz Siddiqui Sues Oxford University for 'Boring' Teaching

It is said that "Kids don't remember what you teach, but they do remember what you are", but here's an instance where a student not only remembers what he was taught but also how he was taught, and poses numerous severe allegations on the teaching style of the Oxford University.

An Indian-origin student has sued Oxford University for "boring" teaching which allegedly resulted in him getting a second class degree and in turn led to loss of earnings in his career as a lawyer. Faiz Siddiqui studied modern history at Brasenose College at the university and accuses its staff of "negligent" teaching of his specialist subject course on Indian imperial history, which led to him getting a 2:1 back in 2000, the High Court in London heard this week. Siddiqui believes he could have had a high-flying career as an international commercial lawyer if he had not got lower grades.

Siddiqui, practiced like a solicitor after college, suffers from depression and insomnia, which he links to his "disappointing examination results", and has said he has a "fundamental inability to hold down any professional day job for any significant length of time". Oxford University argues that the claim is baseless and should be struck out because of the number of years that have passed since Siddiqui graduated.

Julian Milford, the university's barrister, denied that Siddiqui's case had any substance but admitted that "circumstances were difficult" during that year. Siddiqui's legal team claims he is "only one of a number of students who no doubt have proper cause for complaint against the university in relation to this matter". A judgment is expected later in this month.

Nidhi Kumari (FOL)

The Dilemma of a Final Year Student

Industry Requirement & Academic Focus Gap

In the year 2009-10 there was a report published by ASSOCHAM, that millions of positions are still vacant but due to inefficient manpower industry requirement is not fulfilled. We have manpower but not skilled manpower. To some extent situation is same in current scenario.

Every HR professional comes up against certain challenges when they are trying to recruit new staff. The recruiting industry has seen big changes in the last few decades as the economy and technological advances have altered the way many companies hire.

1. Finding the right candidate

Recruiters often see themselves stuck when they are not receiving resume from candidates with strong background or skill sets needed for the position. Even if these recruiters reach out to passive job seekers, they may hit a brick wall in terms of finding the talent they need. And it's a common problem now a day.

2. Students / Applicants Competition

Students are not much concerned about their own career/break but are more curious about the others and that at times, leads to a situation of stress.

3. Changes in business world are fast

Displaying the company's mission and aspects of its internal environment can help job seekers understand the organization better, which can ensure only those candidates who may fit well will apply.

4. An Influx of Ineffective Recruiters

Recruiters should ensure that they have described the company culture and the Job description well.

Students' Mental Block in applying for the jobs

The students in current scenario are not practical, in fact, they are day dreamers. They are not ready to face the challenges which a new comer should / must face. They want immediate jump in the salary and position but equal efforts / inputs are not provided by them.

From not receiving resumes from students with enough practical/internship experiences to being unable to shift through applications effectively, many recruiter encounter numerous issues.

They have attitude problem.

Some other problems:-

1. Loosing self confidence [I am not good enough],
2. That kind of job doesn't exist,
3. I am not getting result

Solutions are simple:-

1. Believe yourself. Focus on what comes naturally to you.
2. Seek out the possibilities first.
3. Learn to see the process, and you will be much happier and effective.

Recruitment Issue

The recruitment process is not that easy as it seems. When searching to hire the best suitable candidate, employers are likely to bump into a lot of big recruitment problems. In today's ever-changing economy, searching for the right job is hard work. The volume of vacancies, types and even pathways are transforming into a pace that can feel impossible to keep up with. And the desire to find a right job that feels meaningful and fulfilling and the job search can become a maddening task.

At last, when there is no room, there are opportunities.

An Alternative view

Safe spaces for LGBT people in Universities

LGBT People are always ignored by the society. They are subjected to bullying, name calling and sometimes incidents of rape or sexual harassment. With the awareness among people about LGBT community, it is the urgent need of the hour to create safe spaces for LGBT people. Students these days work endlessly to sensitize people about the queer community in the vicinity of their campus spaces and have formed certain collectives which provide such space to debate and comfort. Such groups were never limited to the queer issues. These groups also deal with gender sensitization. Dhanak from Jawaharlal Nehru University, work for the LGBT and gender sensitization. This group found out the need of safe spaces and aims to smash gender role. Such groups play a vital role during the annual queer pride parades where they invite people from the queer community to celebrate their queerness and make the campus feel the presence of LGBT in their campus. The rainbow tree, The Big Q, the rainbow painted staircase near Central Library in JNU was done by Dhanak and it's now a ritual for them to renovate them every year during the Pride month in Delhi. Universities from small town, like ours, lack such organized structure because of the patriarchal mind-sets. LGBT students don't have enough courage to come out as they fear of being subjected to bulling and what else they have already suffered in schools. We as responsible human beings need to change our mind-sets and be more accepting towards the LGBT folks.

Debate Competition: “THE BIG ALTERCATION”

Title : “Make In India campaign is nothing but a political gimmick”

Held on : 28/07/2016

Venue : Auditorium, ICFAI University, Dehradun

Coordinated by : Akshika Agarwal, Prabhat Sindwani & Prabhakar Azad

Organized by : Dr. Amit Joshi

IBS organized a debate competition on “Make in India Campaign is nothing but a Political Gimmick”. The debate was planned in 3 stages, in first stage consisted of screening round where a topic was given to the participants and they had to speak 1 minute for and 1 minute against. 14 students were shortlisted. In the second round 2 minute debate was organized on the topic “CCE system has done more harm than good”. After that brain storming session, 12 candidates were shortlisted out of which 6 had to speak for the motion and 6 against the motion.

Results of the debate were: 2nd Runner up: Ishita Bansal

1st Runner up: Tanya Saxena

Best Speaker of The Big Altercation: Oshin Juan

Vice Chancellor Dr. R K Lalwani participated in the debate and shared his experience, he recalled that how Germany used this concept post world war, Vice President Mr. Phadhke suggested the students to involve themselves more on such activities and conduct in depth analysis on such topics. Prof. Raghvendra Kumar Sharma, Prof. Sanjeev Malaviya and Dr. Amit Joshi judged the competition. The event was coordinated by Akshika Agarwal, Prabhat Sindwani and Prabhakar Azad.

“Conjecture”

Seeing, what others want us to see,
Invigorate ‘them’, by subduing our plea.
Tears inside, still continuing with a glee,
Temporal affiance, desisting us to be free.

If this is life then what are we?
Condign figurine, maneuver by thee,
Even if we wish to, cannot flee.
Hypocrisy insinuates a denouement spree.

This world! A forlorn tree,
Subtle roots, nix flowers to be.
Living in the jungle of heartless “he”
Don’t snatch my heart, I prithee,
I plea: let me----- be---- ME

-Dr.Amit Joshi

Guest Lectures

**“Education is the most powerful weapon which you can use
To change the world”**

Nelson Mandela

Three guest lectures were organised from 22nd November, 2016 to -24th November, 2016 on three different & important topics. The lectures were delivered by **Prof. S.C. Sharma** (IES, Retd.) Director IBS, Gurgaon.

1. 22nd Nov. 2016-

Topic: **“Goods & Services Tax”** (122nd Constitution Amendment Bill).

2. 23rd Nov. 2016-

Topic: **“Importance of Human Behaviour”**.

3. 24th Nov, 2016-

Topic: "Becoming a Successful & Effective Manager".

Guest Lecture on Budget Analysis

On 12th August 2016, Dr. Amit Joshi, Faculty at IBS Dehradun, the ICFAI University, Dehradun, delivered a guest lecture on "BudgetAnalysis" at Uttarakhand University, Dehradun.

The highlights of the guest lecture were:

- Inflation declined to 5.4%
- Under "Stand Up" India to be promoted per bank branch per category
- The growth of GDP has accelerated to 7.6%.
- Amidst global headwinds, the Indian economy has held its own.
- Foreign exchange reserves are at highest ever level
- Fiscal deficit for FY 2016-'17 targeted at 3.5%
- Ceiling of tax rebate for tax payers with up to Rs 5 lakh annual income to be raised to Rs 5,000 from Rs 2,000.

Guest Lecture on Effective Communication

Venue : BFIT, Bahuwala, Dehradun
Date : 19.10.2016

Dr. Amit Joshi delivered a guest lecture at BFIT, Dehradun to facilitate effective communication between the students and faculty members.

Highlights:

1. INTEGRATING STUDENT-TEACHER KNOWLEDGE
2. EFFECTIVE AND PATIENT LISTENING
3. LANGUAGE AND PARA-LINGUISTIC ASPECTS
4. BEING UNDERSTOOD
5. FACIAL EXPRESSIONS

Perspective of Modern teaching techniques & Uses of Case studies through Experimental learning

Prof. Raghuvendra sharma conducted knowledge sharing program at hotel pacific. Faculty members from various institutions were invited.

Seminar on “Combating Corruption through Collective Action”

Corruption is one of the biggest threats to the development of our Nation and good governance. Corruption has been a menace which needs to be curbed through collective effort. Keeping this in view, ICFAI Business School, Dehradun in collaboration with Transparency International India, which is a leading nonpolitical, independent, non-governmental anti-corruption organization of India, organized a seminar on “Combating Corruption through Collective Action” at The ICFAI University Dehradun. The seminar was coordinated by Prof. Raghvendra Sharma and Dr. Ankita Srivastava of ICFAI Business School, Dehradun (IBS, Dehradun), and attended by all the faculty and students

Vice Chancellor of The ICFAI University, Dehradun, Dr. Pawan Kumar Aggarwal welcomed the guests and emphasizes that “Prevention is always better than cure and policies should be so designed that these induce compliance rather than corruption. The role of good policies is very important to eradicate corruption.”.

The Chief Guest of the seminar Shri Anil K. Raturi, Director (Vigilance) Govt. of Uttarakhand, said “Corruption begins from us. As the charity begins from home, similarly corruption begins from us. Ethics, moral and legality combine together to fight corruption.” While, the guest of honor Shri A.K. Jain from Transparency International India said, “Corruption should be fought strongly and it should be eliminated rather than reduced”

Prof. Raghvendra Sharma of IBS, Dehradun said that corruption is one of the reasons for brain drain and low development of society. He said, “Corruption is immoral but immortal. It is hard to have a society completely free from corruption. But we can devise mechanisms to keep it under control.”

Fresher Party

2016 MBA and B.Tech (Organized on 10 September, 2016)

Mr. Fresher: Prakash(B.tech)

Miss Fresher: Himangini(MBA)

Mr. IUD: Amit Bharadwaj (MBA)

Miss IUD: Deeksha(B.tech)

Mr. Evening: Sidhant Sirivastva (B.tech)

Ms. Evening: Mainksha (B.Ed)

Mr. Handsome: Vishnu R Nair(MBA)

Miss Beautiful: Anju (MBA)

Mr. Smile: Ajinkya (MBA)

Miss Beautiful Eyes: Pooja (B.tech)

From the scrap book of a teacher.....

Candidly, I never thought to pursue teaching as my carrier. The profession came to me as an accident, and one day a scintillating group found themselves under my tutelage. Nobody told me how to go about my job. Since I had been a student for sixteen years, it was open to me to refer the models that I had observed as a student.

When I started teaching I tried different models which I had learned as a student, within few weeks however I discovered it is not always open to a teacher to choose a particular model. So much depends upon his own interest and pre-disposition. It took me few months to discover that while I did have some ability for orderly presentation, I perhaps lacked the gift of lucidity, at the same time, I felt interested to arouse curiosity, enthusiasm and prompt us to learn for ourselves. This state of mind invariably used to send me to the library and I usually explored further for myself whatever I had been told in the class.

As I was modeling myself as a teacher and accepting the profession which I had undertaken, there were heartening times when the society aguishly asking you to take up a job rather than teach, moreover like every other young individual descending from hills I had toyed with the idea to join Indian air force.

While I cannot say that I am not fascinated by fighter jets anymore but it is clear to me that in opting for teaching I had taken the right decision. Never again in my career, except for some fleeting moments, did I have second thoughts with regard to the career that I had opted. The role of the teacher is crucial. He is the one that shows the way and kindles the students' curiosity and interest, encourages them to follow the path shown by him and smiles with sense of accomplishment just like a parent when they come to know that their students are doing well in their life. The success of a teacher lies in producing students who outstrip him.

There is yet another dimension of teaching which it would be folly to ignore or underplay. The most important influences in the life of any individual are those of the mother and the teacher. Teacher's influence is diffused and somewhat patchy. As a student one is taught by several teachers. While quite a few of them can be influential, it is usually one teacher at a time whose influence dominates and it is that particular influence which to a large extent shapes a student's destiny. A word of praise or blame means so much to the student. Therefore, no student can be indifferent to what his teachers think of him. A careless word or a false move by the teacher can have long range implications. A teacher, even if he wishes to divest himself of the role thrust upon him, cannot help the fact that what he does or fails to do will influence the students who come into contact with him.

Looking back at my tenure as a teacher, with every 'sweet of placement' that students bring, with every phone call I receive of promotion, with every wedding card, with every tear of parting, with every anguish of presentations, with every request not to teach, with every failed attempt of mass bunk, with every difference of opinions, with every apprehensive voice seeking permission, I saw the love, respect and care. I thank my students for making me what I am.....

A TEACHER.
